LUMORA

ABOUT US :

LUMORA is a digital safe haven providing immediate support through moodtracking, AI driven coping exercises and a moderate peer community. Unlike all other apps based on mental health issues, Lumora is always ready to jump in when life throws chaos your way.

OUR MISSION:

To provide a digital safe haven where users can safely track their emotional journey, find immediate relief in moments of distress, and build long-term resilience through self-awareness and community support.

STRUCTURE:

Currently operating as a Partnership, with the future goal of incorporating as a Social Enterprise to ensure our mental health resources remain sustainable and impactful.

OBJECTIVES:

To have launched our app on the app store by the beginning of April where it will be able to help users be aware of their mental health situation at the same offering them the safe and non-judgement interaction.

- Help users become aware of their mental state
- Track emotional patterns over time
- Provide AI-based support and recommendations.
- Encourage healthier coping habits

"You can't go back and change the beginning , but you can start where you are and change the ending".

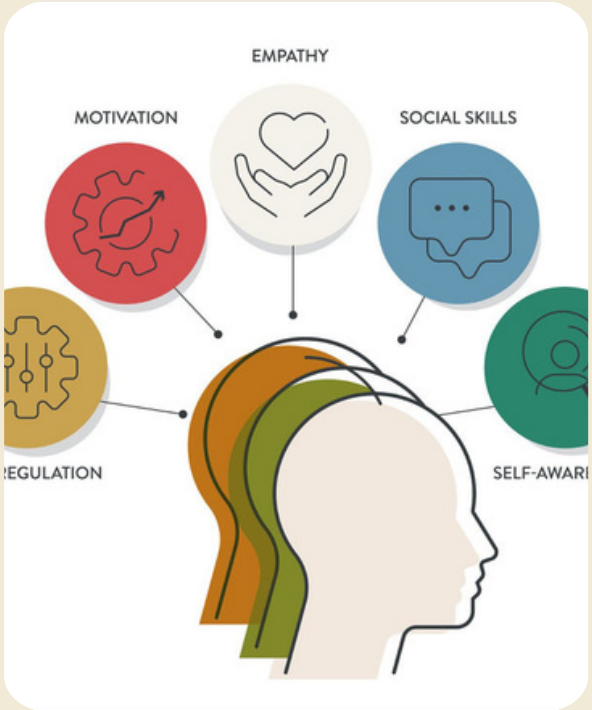
Management:

All the operations of Lumora are directed by the owner which is the team cipher x.

CIPHER X MEMBERS	ROLE	MAIN CONTRIBUTION
INONO Aicy Tekla	Project Manager	Strategy and Goal Alignment.
KIRABO Vanessa	Lead Developer	Coding and Data Security.
AGASARO Belise	UX/UI Designer:	Safe haven visuals and ease of our app use.
UWASE Peace	Marketing Lead	User Acquisition and Brand Story
IGENO Raina	Financial Lead:	Budgeting and Social Enterprise Model.

OUR SERVICES :

Lumora is your super hero sidekick that ensures your mental health support and community connection by acting as your digital day to day safe haven. Lumora is your pocket sized guardian Angel since by the use of emotional intelligence tools , it helps you track your everyday mood in addition to offering you guidance in your journey.



OUR HISTORY :

Lumora started after an observation which was carried out by Cipher x where a loophole in the mental health sector was at stake. After this observation, the question asked how we can help to solve this in our abilities. After this, an intense research was conducted and from this, we found out that these natives need a digital safe haven which will always be ready to jump in when life throws chaos their way. The analysis was conducted by the team and enhancement was suggested where the mood tracking feature was given to Lumora to make it have advantage over other therapy apps.

PRODUCTS AND SERVICES

- *Mood tracking and analytics*
- *Digital journaling*
- *Resource library*
- *Guided mediation courses*
- *Personalised wellness plans*
- *Therapeutic advices*

TARGET MARKET

- Teenagers and young adults
- Students under stress
- People dealing with anxiety or depression
- Anyone interested in tracking their mental wellbeing

INDUSTRY TREND

The mental health industry in 2026 is moving toward accessibility, personalization, and integration, with technology playing a central role.

MAIN FEATURES

- On boarding survey
- Daily mood check
- Mood tracking
- AI chat assistant
- Activities feature
- Advice library.
- Emergency support
- Settings

COMPETITORS

- Our leading competitors are: Calm, Headspace, BetterHelp, Talkspace, Moodfit, and Sanvello and others which mainly focus on mental health and not mood tracking.

STRATEGY AND IMPLEMENTATION

- Build a rights-based, community-centered framework aligned with global health priorities.
- Focus on training, awareness, service delivery, and monitoring and also collaboration.

Strategy and implementation

- **MARKETING STRATEGY**

The project will focus on direct-to-consumer growth, reaching individuals through social media, digital communities, and local lifestyle spaces. We will market the app as a "Personal Wellness Companion" that gives individuals total control over their mood tracking and mental health journey.

Validation: We will conduct a user-led study where individuals opt-in to track their mood and resilience over time. This data will prove the app's impact and help us refine features for individual needs.

Individual Awareness:. The prompt will be a personal invitation: "How are you feeling today?"

- **Branding**:

The brand identity is designed to be personal, discreet, and comforting.

1.**The Name** :emphasizes on a "personal path" or "daily ritual" rather than a clinical service.

2.**Visuals**: A palette of lavenders that provide a peaceful private atmosphere.

- **Distribution**

The application will launch as a completely free tool on both iOS and Android stores at once. By ensuring cross-platform availability from Day 1, we remove technical barriers and allow for a more cohesive community launch. We will prioritize a direct feedback loop, using input from our early global user base to continuously improve the mood-tracking interface and coping tools.

Market Analysis

Entity	Core Strengths	Core Weaknesses
Headspace / Calm	• Massive library of high-quality • Audio Global brand trust • Scientific backing for sleep.	• High subscription cost ($70+) • Passive experience (user just listens) • No community interaction.
BetterHelp	• Access to licensed human doctors • Professional clinical 1-on-1 sessions.	• Extremely expensive • Not designed for daily habit tracking, • High "barrier to entry" for casual users.
Daylio / Moodfit	• Excellent data visualization • Easy-to-use, • Mood logging • Privacy-focused.	• "Lonely" UX; No peer support or "Safe haven " space. • Can feel like a chore/homework over time.
Lumora	• Mood tracking capability • Acting as a direct therapist. • Offering guidance to the user. • alerting your guardian during a crisis. • Community connection	• Moderation challenges • Digital divide • Stigma barrier New brand (trust building)

Advanced Mood Analytics	✓	✓	–
Anonymous Vent Wall	✓	–	–
Crisis Intervention AI	✓	–	✓
Cross-Platform Sync	✓	✓	✓

CUSTOMER RESEARCH

Developing our customer personas, we relied on the survey results below:

Name	Age	Role	Frustration	How Lumora Helps
Brenda	19	The User	Struggles with high-functioning anxiety; feels like she has "no one to talk to" without being a burden to her family.	Offers an Anonymous Safe haven to release emotions and track triggers without the social pressure of "looking okay."
Marc	30	The Supporter	His partner has bipolar disorder; he feels helpless and lacks the tools to understand their emotional cycles.	Uses the Education Portal to learn coping strategies and uses the shared "Trend Reports" to better support his partner.
Dr. Arena	45	The Clinician	Only sees patients once a week; lacks accurate data on what happens to their mood between sessions.	Encourages patients to use the Mood Tracker to generate "Bio-Feedback Reports," making therapy sessions 50% more efficient.

FINANCIAL PLAN AND PROJECTION

- **Startup capital:** $470 from our network + $80 personal savings.
  Goal: Use these funds for social media ads to reach our first 2,000 users.

- **Revenue Streams:**
  1. **Premium Users (30%):** A paid "Plus" version for advanced mood analytics and private tools.
  2. **Institutional Partners (15%**): Our partners pay for a dashboard to track group wellness trends.
  3. **Email Marketing**: No in-app ads. We charge wellness brands $1–$5 to be featured in our weekly resource emails.

- **Operating costs:**
  1. **Technology and hosting**: database and cloud hosting, software subscriptions.
  2. **Marketing**: social media ads and community workshops
  3. **Development and Legality**: app store fees, data security, encryption, and legal disclaimers.
